TABLES

<u>Table No.</u>	<u>Page No.</u>
1. Federal order minimum class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, September	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-September averages	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, September.	8
4. Producer milk deliveries used in Class I and Gross Class I sales by handlers regulated under Federal orders, September	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I, January-September	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, August 1964, with comparisons.	14
7. Federal milk order Class I formula price information, September 1964.	18
8. Federal order base and excess prices for milk of 3.5 percent butterfat content and minimum class and blend prices at basic test (markets where basic test is other than 3.5 percent), September.	19
8a. Seasonal incentive fund deductions under various Federal milk orders, September 1963 and 1964	19
9. Prices and economic indexes used in Federal milk order formulas to determine September 1964 prices, with comparisons	20

MAJOR ORDER ACTIONS, SEPTEMBER 1964Amendments:

Fort Wayne (September 1). Action provides an optional basis for diverting producer milk to nonpool plants during September through December.

Sioux City (September 1). Action classifies milk used to produce aerated cream as Class II.

Suspension:

Inland Empire (September 16). Suspension will allow diversions of producer milk during the months of September through November 1964.

Terminations:

Central Mississippi and Mississippi Gulf Coast (September 1). This action terminates the Central Mississippi and Mississippi Gulf Coast milk orders effective on and after September 1, 1964.

Great Basin (September 2). Action terminates the base and excess plan for paying producers.

Determination:

Mississippi Delta (September 1). This action determines a Class I price for the Mississippi Delta marketing area for September 1964 and subsequent months that is equivalent to the price computed previously based on the Central Mississippi order which was terminated September 1, 1964. Such price would be the Minnesota-Wisconsin plus \$2.00.

FEDERAL MILK ORDER MARKET STATISTICS

HighlightsSeptember 1964

Producer Deliveries. A total of 150,792 producers delivered 3.8 billion pounds of milk to regulated handlers in 72 markets. This represents an increase of 2.1 percent over producer deliveries in September 1963. Average daily delivery per producer increased from 780 pounds in September 1963 to 842 pounds in September of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries used in Class I. The volume of producer deliveries used in Class I in 72 markets increased 3.3 percent from last year, to a total of 2.6 billion pounds for the month of September. Changes in sales from the same month a year ago are influenced by the number of delivery days in the respective periods. In September 1964 there was an additional delivery day as compared to September 1963. The average utilization percentage for September 1964 was 67 percent. Thirty-three markets showed an increase in the utilization percentage, six showed no change, and the remaining 33 markets showed a decrease (see table 4).

Gross Class I sales, which include total Class I sales, in-and-out of defined marketing areas by regulated handlers, increased 3.2 percent in the 72 markets for the month of September.

Minimum Prices. The weighted average Class I price paid by handlers in the 72 markets for 3.5 percent milk was \$4.97 per hundredweight, three cents higher than the \$4.94 per hundredweight price in September 1963. Minimum Class I prices for September were higher in 55 markets and lower in the remaining 17 markets.

Producers in the 72 markets received a weighted average blend price of \$4.45 per hundredweight for 3.5 percent milk. This is seven cents higher than the September 1963 blend price of \$4.38. Producers received higher blend prices in 48 markets, the same price in five markets, and a lower price in the remaining 19 markets. Class Prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Whole Milk Sales. Total in-area whole milk sales for September 1964 in 74 marketing areas are estimated to be about 1.8 billion pounds, 3.1 percent above such sales in September of last year. Complete August in-area sales data for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-September period for the 72 markets was \$4.76, six cents higher than the \$4.70 price in 1963. The 1964 weighted average blend price was \$4.10, six cents higher than the blend price of \$4.04 reported for this period in 1963 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first nine months of this year, compared to the same period in 1963, producer receipts for the 72 markets were up 2.1 percent, and receipts used in Class I were up 2.2 percent. Data for the 72 markets and for all markets are summarized below.

Producer Milk Deliveries and Deliveries Used in Class I, January-September

Markets	Producer deliveries			Deliveries used in Class I		
	1964		Change from 1963 1/	1964		Change from 1963 1/

1/ Volumes include 29-day totals for February 1964. The percentage changes are based on adjusted 28-day totals for February 1964 to make them comparable with 1963.

2/ Markets under regulation on January 1, 1963, and which have had no significant marketing area expansions. Excludes Delaware Valley, Tri-State, Columbus, Indianapolis, Memphis, Central Arkansas, Western Colorado, and Colorado Springs-Pueblo; Central Mississippi and Mississippi Gulf Coast which were terminated September 1, 1964.

3/ Class I plus Class II = 4,643,231 thousand pounds in 1964 and 4,571,141 thousand pounds in 1963; utilization = 52% in 1964 and 51% in 1963.

4/ Class I plus packaged fluid cream = 1,974,908 thousand pounds in 1964 and 1,965,431 thousand pounds in 1963; utilization equals 43% in 1964 and 44% in 1963.

5/ January through August.

6/ January through September.

1/ Daily averages reported for Boston, Springfield, and Worcester exclude cream items for which data are not currently available. Cream sales in these markets also are excluded from the total for 76 combined areas.

2/ Plain, flavored, and fluid equivalent of concentrated.

3/ The percentage changes are based on adjusted 28-day totals for February 1964 to make them comparable with 1963.

4/ Sales for marketing area as defined after 1963 amendment.

5/ Sales for marketing area as defined prior to 1964 amendment.

6/ Plain, fortified, and flavored skim and part skim milk, buttermilk, and cultured specialties.

7/ Excludes Boston, Springfield, and Worcester.

8/ Small amount of sales estimated.
